DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 4 recites the limitation "the wireless receiver circuitry". There is insufficient antecedent basis for this limitation in the claim.
4. Regarding claim 4, the phrase "when a activation tone is detected..." is unclear. Suggest correction: "when an activation tone is detected..."

Claims 5-10 depend on claim 4. Thus, claims 5-10 are also rejected under 35 U.S.C. 112, second paragraph.

Allowable Subject Matter

5. Claims 4-10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
6. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 11, the admitted prior art teaches a communication device, comprising: a wireless part wireless part including a wireless transmitter (e.g., part 151) and wireless receiver (e.g., part 150, see fig. 1); a transmitter/receiver part including a receiver circuit (e.g., receiver 8) for processing a reception signal received by the wireless receiver and a

transmitter circuit (e.g., transmitter 11) for processing a transmission signal transmitted by the wireless transmitter (see fig. 1); and a control part selectively connecting the wireless transmitter to the transmitter circuit and selectively connecting the wireless receiver to the receiver circuit according to a switched stand-by mode and communication mode (see fig. 1 and the Back ground of the invention, page 3, lines 4-13).

However, the closest prior arts, Day et al. (US 4,082,919), Schwartzman et al. (US 5,479,474), either alone or in combination, fail to teach the control part further including a tone generator configured to output an activation tone on the transmission signal when switched to the communication mode, the activation tone automatically causing a handset receiving the transmission signal to switch from a reception mode to a reception and transmission mode, in combination with all of other limitations in the claims.

Claims 2-3 depend on claim 1. Thus, they are allowable.

Claims 12-16 depend on claim 11. Thus, they are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
